

Overview

You will develop a common core of IT knowledge and study areas such as the relationship between hardware and software that form an IT system, managing and processing data to support business and using IT to communicate and share information.

Course overview

External (exam) Component 3: Effective Digital Working Practices.

Internal Component 2: Collecting, Presenting and Interpreting Data.

You will understand the characteristics of data and information and how they help organisations in decision making. You will also use data manipulation methods to create a dashboard to present and draw conclusions from information.

About the sector

Digital skills span all industries; almost all jobs in the UK today require employees to have a good level of digital literacy. The UK has positioned itself to be the 'digital capital of Europe' as it continues to invest billions every year in digital skills and commerce.

The value of Digital Information

You will explore how organisations use digital systems and the wider implications associated with their use. You will analyse information in a range of vocational contexts so that you develop a greater understanding of the use of digital systems by organisations and so that you are able to make reasoned judgements on the systems.
